

Meet the team

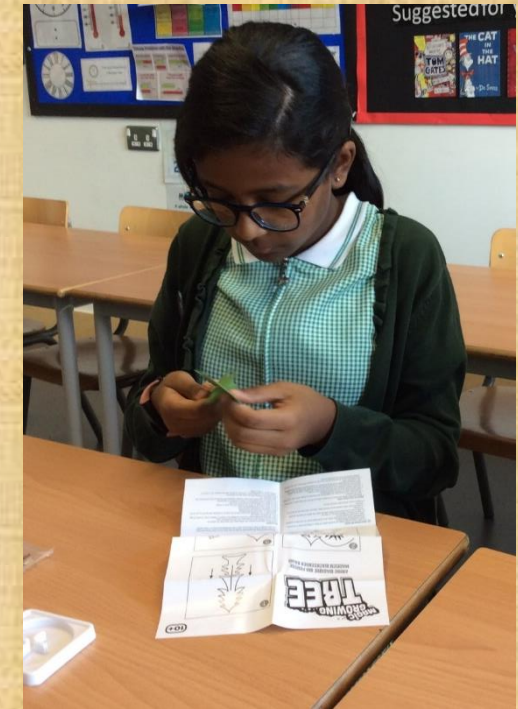

The Science Ambassadors took home science equipment to explore, investigate and observe. They took photos of their experiences.

I am proud to be a Science Ambassador because I love science and want to help others to have a better understanding and enjoy it like I do.

I really enjoy science. I particularly like animals, space and the planets. I really wanted to represent the class as science is important.

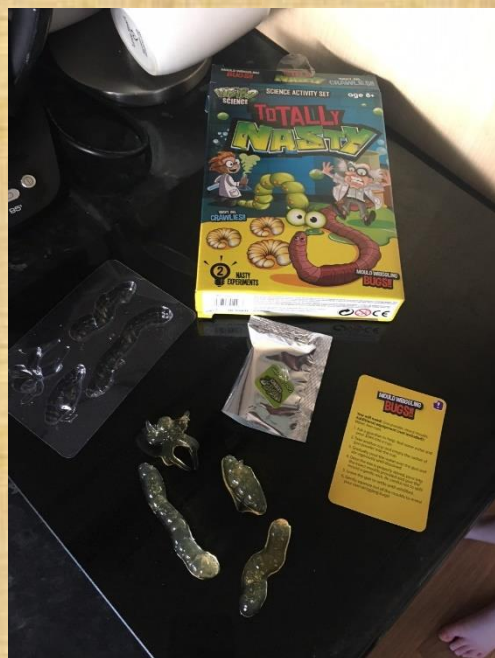

I am really enjoying being a Science Ambassador particularly doing experiments at home. I have even got the whole family involved. We loved making slime even though it did take 12 hours to make!

I am proud to be a Science Ambassador. I consider myself to be a good team player and a good leader. I am willing to help others and as Albert Einstein always said: "The important thing is not to stop questioning".

Science is my favourite subject! I even love doing it at home on my own. I want to get more ideas about science to do at home. I have wanted to be a Science Ambassador ever since Mrs Bowen told us about it in assembly. If I am chosen I will be very excited and will represent my class the best I can.

I wanted to be a Science Ambassador because I have a good understanding of science. I love science and I would like to help share my love of science with others. Understanding science helps us make more informed decisions about the world and how we can change it.

I am very proud to be our class Science Ambassador. I have enjoyed all of our science topics but my favourite was learning about different bones.

I am happy to be a Science Ambassador because when I grow up I want to become a professional scientist.

I am proud to be a Science Ambassador as I love doing experiments. I enjoy experimenting with magnets. Forces are fun!

I have really enjoyed using my bug collector because I can use it at home. I enjoy science and I am proud to be a Science Ambassador.

I am pleased to be the Science Ambassador for my class. I love learning about the different seasons and how the weather changes.

I like learning about the different seasons. My favourite season is Summer. I like flowers too! My favourite flower is a Daisy. I am proud to be the Science Ambassador for my class and wear my badge with pride.

Thank you for choosing me to be a Science Ambassador. I am honoured to have the role.

I have really enjoyed exploring the garden using my magnifying glass. I like science and I am happy to be a Science Ambassador.

I am really excited about exploring. I have collected some very small insects today and used my magnifying glass to look at them. I am happy to be a Science Ambassador.

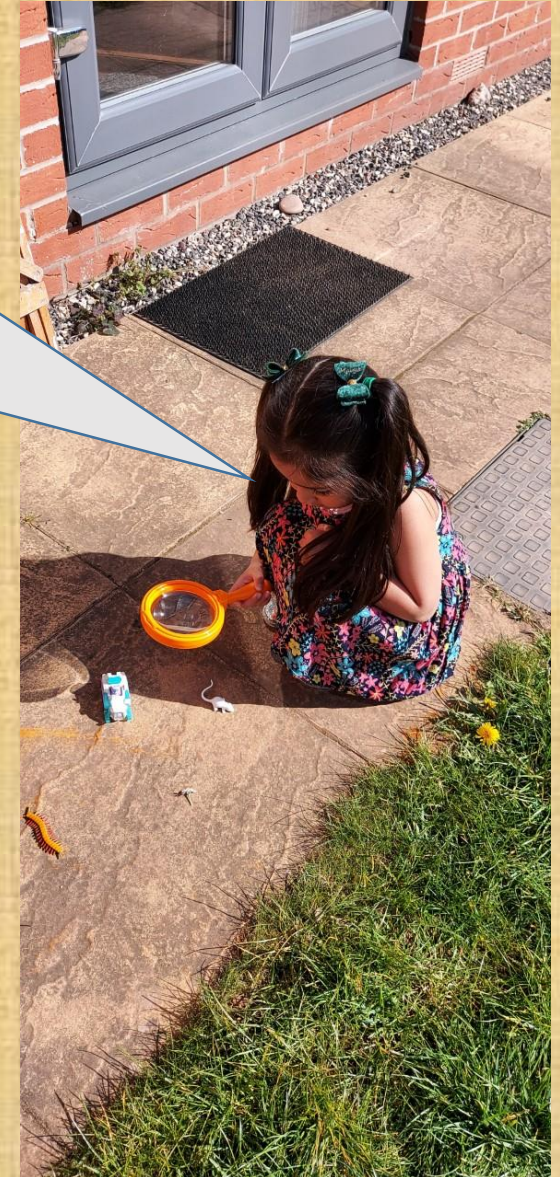

I like being Science Ambassador. I like spinning the wheels of my car and stopping them in my play dough. I have hundreds of tricks. I like dinosaurs, especially the T-Rex.

I like science because I love animals.
My favourites are penguins, frogs,
giraffes with their long necks and cats.

I am really pleased that I am a Science Ambassador. Here I am using my magnifying glass in my garden. It was fun!

I am over the moon with my dinosaurs. I like playing with them. I like being Science Ambassador.
